To travel to a connecting
flight in a nearby city

The Honeywell survey was conducted by Wakefield Research (www.wakefieldresearch.com) among 1,000 US adult fliers, ages 18+, where "fliers" was defined as those who have taken at least 5 round-trip flights in the past 12 months. It was executed between December 5th and December 12th, 2024, using an email invitation and online survey.
