- 1 See additional information at the end of this release regarding non-GAAP financial measures.
- 2 Segment margin and adjusted EPS are non-GAAP financial measures. Management cannot reliably predict or estimate, without unreasonable effort, the impact and timing on future operating results arising from items excluded from segment margin or adjusted EPS. We therefore, do not present a guidance range, or a reconciliation to, the nearest GAAP financial measures of operating margin or EPS.
- 3 Adjusted EPS and adjusted EPS V% guidance excludes items identified in the non-GAAP reconciliation of adjusted EPS at the end of this release, and any potential future one-time items that we cannot reliably predict or estimate such as pension mark-to-market.

Honeywell is an integrated operating company serving a broad range of industries and geographies around the world. Our business is aligned with three powerful megatrends - automation, the future of aviation, and energy transition - underpinned by our Honeywell Accelerator operating system and Honeywell Connected Enterprise integrated software platform. As a trusted partner, we help organizations solve the world's toughest, most complex challenges, providing actionable solutions and innovations that help make the world smarter, safer, and more sustainable. For more news and information on Honeywell, please visit [www.honeywell.com/newsroom](http://www.honeywell.com/newsroom).

Honeywell uses our Investor Relations website, [www.honeywell.com/investor](http://www.honeywell.com/investor), as a means of disclosing information which may be of interest or material to our investors and for complying with disclosure obligations under Regulation FD. Accordingly, investors should monitor our Investor Relations website, in addition to following our press releases, SEC filings, public conference calls, webcasts, and social media.

We describe many of the trends and other factors that drive our business and future results in this release. Such discussions contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Forward-looking statements are those that address activities, events, or developments that management intends, expects, projects, believes or anticipates will or may occur in the future. They are based on management's assumptions and assessments in light of past experience and trends, current economic and industry conditions, expected future developments and other relevant factors, many of which are difficult to predict and outside of our control. They are not guarantees of future performance, and actual results, developments and business decisions may differ significantly from those envisaged by our forward-looking statements. We do not undertake to update or revise any of our forward-looking statements, except as required by applicable securities law. Our forward-looking statements are also subject to material risks and uncertainties, including ongoing macroeconomic and geopolitical risks, such as lower GDP growth or recession, capital markets volatility, inflation, and certain regional conflicts, that can affect our performance in both the near- and long-term. In addition, no assurance can be given that any plan, initiative, projection, goal, commitment, expectation, or prospect set forth in this release can or will be achieved. These forward-looking statements should be considered in light of the information included in this release, our Form 10-K and other filings with the Securities and Exchange Commission. Any forward-looking plans described herein are not final and may be modified or abandoned at any time.

This release contains financial measures presented on a non-GAAP basis. Honeywell's non-GAAP financial measures used in this release are as follows:

- Segment profit, on an overall Honeywell basis;
- Segment profit margin, on an overall Honeywell basis;
- Organic sales growth;
- Free cash flow; and
- Adjusted earnings per share.

Management believes that, when considered together with reported amounts, these measures are useful to investors and management in understanding our ongoing operations and in the analysis of ongoing operating trends. These measures should be considered in addition to, and not as replacements for, the most comparable GAAP measure. Certain measures presented on a non-GAAP basis represent the impact of adjusting items net of tax. The tax-effect for adjusting items is determined individually and on a case-by-case basis. Refer to the Appendix attached to this release for reconciliations of non-GAAP financial measures to the most directly comparable GAAP measures.

**Non-GAAP Financial Measures**

The following information provides definitions and reconciliations of certain non-GAAP financial measures presented in this press release to which this reconciliation is attached to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles (GAAP).

Management believes that, when considered together with reported amounts, these measures are useful to investors and management in understanding our ongoing operations and in the analysis of ongoing operating trends. These measures should be considered in addition to, and not as replacements for, the most comparable GAAP measure. Certain measures presented on a non-GAAP basis represent the impact of adjusting items net of tax. The tax-effect for adjusting items is determined individually and on a case-by-case basis. Other companies may calculate these non-GAAP measures differently, limiting the usefulness of these measures for comparative purposes.

Management does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with GAAP. The principal limitations of these non-GAAP financial measures are that they exclude significant expenses and income that are required by GAAP to be recognized in the consolidated financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgments by management about which expenses and income are excluded or included in determining these non-GAAP financial measures. Investors are urged to review the reconciliation of the non-GAAP financial measures to the comparable GAAP financial measures and not to rely on any single financial measure to evaluate Honeywell's business.

We define organic sales percentage as the year-over-year change in reported sales relative to the comparable period, excluding the impact on sales from foreign currency translation and acquisitions, net of divestitures, for the first 12 months following the transaction date. We believe this measure is useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.

A quantitative reconciliation of reported sales percent change to organic sales percent change has not been provided for forward-looking measures of organic sales percent change because management cannot reliably predict or estimate, without unreasonable effort, the fluctuations in global currency markets that impact foreign currency translation, nor is it reasonable for management to predict the timing, occurrence and impact of acquisition and divestiture transactions, all of which could significantly impact our reported sales percent change.

1 Included in Selling, general and administrative expenses.

2 Includes repositioning, asbestos, environmental expenses, equity income adjustment, and other charges. For the three months ended June 30, 2023, other charges include \$2 million of benefit due to the Russia-Ukraine conflict.

3 Included in Cost of products and services sold and Selling, general and administrative expenses.

4 Includes acquisition-related fair value adjustments to inventory.

We define operating income as net sales less total cost of products and services sold, research and development expenses, and selling, general and administrative expenses. We define segment profit, on an overall Honeywell basis, as operating income, excluding stock compensation expense, pension and other postretirement service costs, amortization of acquisition-related intangibles, certain acquisition-related costs, and repositioning and other charges. We define segment profit margin, on an overall Honeywell basis, as segment profit divided by net sales. We believe these measures are useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.

A quantitative reconciliation of operating income to segment profit, on an overall Honeywell basis, has not been provided for all forward-looking measures of segment profit and segment profit margin included herein. Management cannot reliably predict or estimate, without unreasonable effort, the impact and timing on future operating results arising from items excluded from segment profit, particularly pension mark-to-market expense as it is dependent on macroeconomic factors, such as interest rates and the return generated on invested pension plan assets. The information that is unavailable to provide a quantitative reconciliation could have a significant impact on our reported financial results. To the extent quantitative information becomes available without unreasonable effort in the future, and closer to the period to which the forward-looking measures pertain, a reconciliation of operating income to segment profit will be included within future filings.

Acquisition amortization and acquisition-related costs are significantly impacted by the timing, size, and number of acquisitions we complete and are not on a predictable cycle, and we make no comment as to when or whether any future acquisitions may occur. We believe excluding these costs provides investors with a more meaningful comparison of operating performance over time and with both acquisitive and other peer companies.

For the twelve months ended December 31, 2024, expected acquisition-related intangibles amortization includes approximately \$315 million, net of tax benefit of approximately \$85 million.

4 For the three months ended June 30, 2024, the adjustment for acquisition-related costs, which is principally comprised of third-party transaction and integration costs and acquisition-related fair value adjustments to inventory, is approximately \$22 million, net of tax benefit of approximately \$7 million. For the three months ended June 30, 2023, and twelve months ended December 31, 2023, the adjustment for acquisition-related costs, which is principally comprised of third-party transaction and integration costs and acquisition-related fair value adjustments to inventory, is approximately \$1 million and \$7 million, net of tax benefit of approximately \$0 million and \$2 million, respectively. For the twelve months ended December 31, 2024, the expected adjustment for acquisition-related costs, which is principally comprised of third-party transaction and integration costs and acquisition-related fair value adjustments to inventory, is approximately \$45 million.

5 For the three months ended June 30, 2023, the adjustment was \$1 million, without tax benefit. For the twelve months ended December 31, 2023, the adjustment was a benefit \$3 million, without tax expense. For the twelve months ended December 31, 2024, the expected adjustment is a \$17 million expense, without tax benefit, due to the settlement of a contractual dispute with a Russian entity associated with the Company's suspension and wind down activities in Russia.

6 For the three months ended June 30, 2023 and the twelve months ended December 31, 2023, the adjustment was \$8 million, net of tax benefit of \$3 million, due to the net expense related to the NARCO Buyout and HWI Sale.

7 Bendix Friction Materials ("Bendix") is a business no longer owned by the Company. In 2023, the Company changed its valuation methodology for calculating legacy Bendix liabilities. For the twelve months ended December 31, 2023, the adjustment was \$330 million, net of tax benefit of \$104 million (or \$434 million pre-tax) due to a change in the estimated liability for resolution of asserted (claims filed as of the financial statement date) and unasserted Bendix-related asbestos claims. The Company experienced fluctuations in average resolution values year-over-year in each of the past five years with no well-established trends in either direction. In 2023, the Company observed two consecutive years of increasing average resolution values (2023 and 2022), with more volatility in the earlier years of the five-year period (2019 through 2021). Based on these observations, the Company, during its annual review in the fourth quarter of 2023, reevaluated its valuation methodology and elected to give more weight to the two most recent years by shortening the look-back period from five years to two years (2023 and 2022). The Company believes that the average resolution values in the last two consecutive years are likely more representative of expected resolution values in future periods. The \$434 million pre-tax amount was attributable primarily to shortening the look-back period to the two most recent years, and to a lesser extent to increasing expected resolution values for a subset of asserted claims to adjust for higher claim values in that subset than in the modelled two-year data set. It is not possible to predict whether such resolution values will increase, decrease, or stabilize in the future, given recent litigation trends within the tort system and the inherent uncertainty in predicting the outcome of such trends. The Company will continue to monitor Bendix claim resolution values and other trends within the tort system to assess the appropriate look-back period for determining average resolution values going forward.

We define adjusted earnings per share as diluted earnings per share adjusted to exclude various charges as listed above. We believe adjusted earnings per share is a measure that is useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends. For forward-looking information, management cannot reliably predict or estimate, without unreasonable effort, the pension mark-to-market expense as it is dependent on macroeconomic factors, such as interest rates and the return generated on invested pension plan assets. We therefore do not include an estimate for the pension mark-to-market expense. Based on economic and industry conditions, future developments, and other relevant factors, these assumptions are subject to change.

Acquisition amortization and acquisition-related costs are significantly impacted by the timing, size, and number of acquisitions we complete and are not on a predictable cycle and we make no comment as to when or whether any future acquisitions may occur. We believe excluding these costs provides investors with a more meaningful comparison of operating performance over time and with both acquisitive and other peer companies.

We define free cash flow as cash provided by operating activities less cash for capital expenditures.

We believe that free cash flow is a non-GAAP measure that is useful to investors and management as a measure of cash generated by operations that will be used to repay scheduled debt maturities and can be used to invest in future growth through new business development activities or acquisitions, pay dividends, repurchase stock, or repay debt obligations prior to their maturities. This measure can also be used to evaluate our ability to generate cash flow from operations and the impact that this cash flow has on our liquidity.
